

Bayartis GmbH

Simplify medication management

OUR MISSION

Transform elderly care through AgeTech by creating a safe, secure and intelligent system for medication adherence. We help seniors stay healthy at home by preventing missed doses, avoiding harmful drug interactions, and ensuring that their medicines are always available and stored properly.

What drives us:

We don't look away from the challenges our parents and grandparents face every day. We build solutions that matter.

If our mission speaks to you, let's connect - together, we can make a real difference.

Our Solution: BAEDIA app

Comprehensive Medication Management at your home:

Track and monitor all prescribed and over-the-counter medications safely

Extend care to family members or healthcare professionals through our Share-MyCabinet functionality

Never miss doses with smart notifications based on prescribed dosing schedules and inventory levels

Always up-to-date patient leaflets and information on side effects and interactions.

Store medications properly with our optional temperature-controlled Medicine Cabinet (in development)

Ready to be part of the AgeTech revolution?

Are you passionate about building meaningful solutions? Whether you're experienced or just starting out, your skills can help us shape the future of elderly care.
